A MESSAGE TO OUR CLIENTS

Your Business Deserves Technology That Works for You.

Growing a business often means dealing with disconnected systems, repetitive tasks, manual reporting, and processes that become harder to manage over time.

WHAT WE BRING

- **Odoo ERP implementation**
- **AI-powered workflow automation**
- **Custom software development**

TECHNOLOGY FOR WHAT'S POSSIBLE

FROM OUR CEO & PARTNER

A Message to Our Clients

Odoo ERP · AI Automation · Custom Software

01 · THE CHALLENGE WE SOLVE

At Finovo Global, we help businesses solve these challenges with **practical technology solutions** designed around the way they operate.

02 · WHAT WE BUILD

From implementing Odoo ERP to automating workflows with AI and developing custom software, our focus is simple: build systems that make your business **easier to manage, more efficient to run, and better prepared for growth**.

03 · WHAT WE BELIEVE

We believe technology should **solve real problems**, not create new ones.

Let's build something that moves your business forward.

JQ

Jamal Qadir
CEO & Partner · Finovo Global

Who We Are

TECHNOLOGY SOLUTIONS BUILT AROUND YOUR BUSINESS

Finovo Global helps businesses **modernize their operations** through ERP implementation, AI-powered automation, and custom software development.

We work with businesses looking to improve visibility, streamline workflows, connect systems, and reduce unnecessary manual work.

Our approach combines business understanding, technical execution, and practical problem-solving.

OUR THREE CORE SERVICE AREAS

01 **Odoo ERP Solutions**

Connect business functions through an integrated system for managing operations, finance, sales, inventory, and more.

02 **AI Business Automation**

Automate repetitive processes, improve information handling, and build AI-powered workflows that support your team.

03 **Custom Software Development**

Create business applications, portals, dashboards, and software tailored to your specific needs.

Technology. Automation. Growth.

Systems that make your business easier to manage, more efficient to run, and better prepared for growth.

Our Foundation

Technology. Automation. Growth.

Our goal isn't simply to deliver software. It's to help businesses get more value from the way they work.

01

MISSION · OUR PURPOSE

Mission

To help businesses operate smarter through accessible, scalable, and purpose-built technology solutions.

02

VISION · OUR DIRECTION

Vision

To become a trusted technology partner for businesses seeking sustainable growth through digital transformation.

03

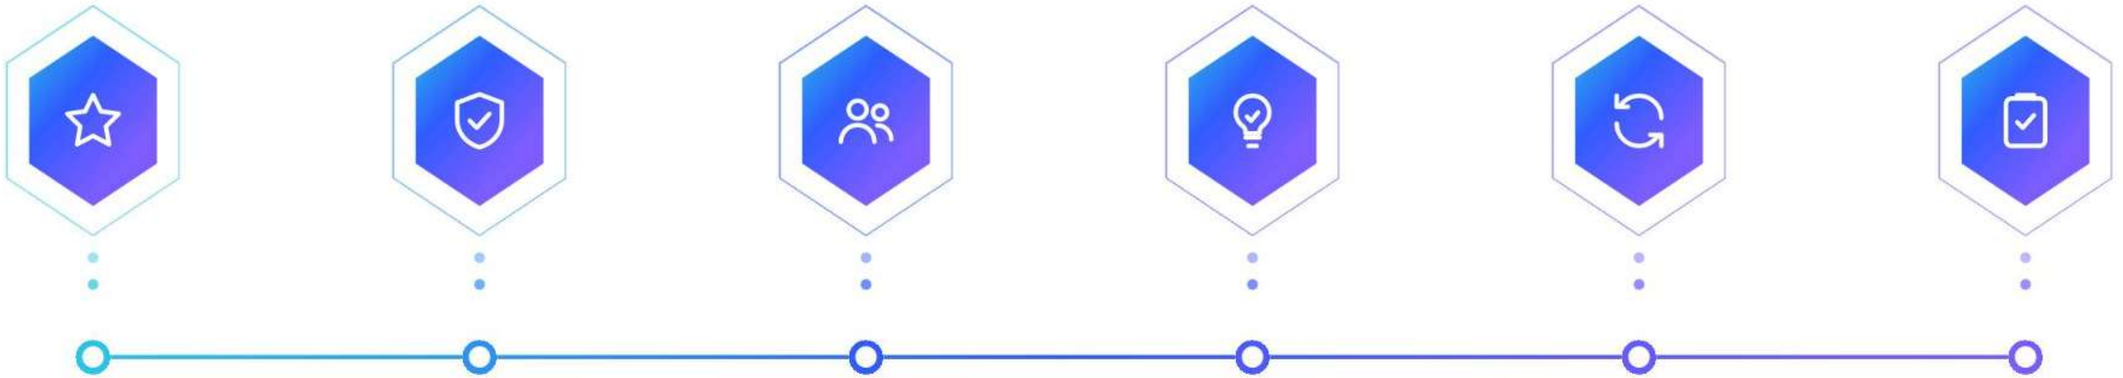

GOALS · OUR IMPACT

Goals

- Reduce repetitive manual work.
- Improve operational visibility and control.
- Connect disconnected business systems.
- Help teams make better-informed decisions.
- Build scalable technology around business needs.
- Support long-term digital transformation.

Our Core Values

What guides our work.

01

Excellence

We aim for reliable solutions, thoughtful implementation, and quality delivery.

02

Integrity

We communicate clearly, set realistic expectations, and prioritize practical outcomes.

03

Collaboration

We work with clients to understand their processes, challenges, and goals.

04

Innovation

We explore technology that solves meaningful business problems.

05

Continuous Improvement

We help businesses refine their systems as their requirements evolve.

06

Accountability

We value clear responsibilities, transparent progress, and dependable support.

Why Finovo *Global?*

TECHNOLOGY SHOULD SOLVE PROBLEMS,
NOT ADD COMPLEXITY.

01

PRIMARY PILLAR

Business-first approach.

We start by understanding your operations before recommending technology.

02

Three complementary capabilities.

ERP, AI automation, and custom development let us address different parts of your technology needs.

03

Solutions built around your workflows.

We adapt implementation and development to your business requirements and agreed scope.

04

Practical, scalable delivery.

We focus on solutions that can grow alongside your business.

05

Clear communication.

We define deliverables, milestones, responsibilities, and next steps.

06

Ongoing improvement.

We can continue supporting, refining, and extending solutions after launch through agreed support arrangements.

Our Technology Services

THREE SERVICES. ONE BUSINESS-FOCUSED APPROACH.

Our approach combines business understanding, technical execution, and practical problem-solving.

01

Odoo ERP Solutions

- Odoo implementation and configuration
- Business process analysis
- Module setup and customization
- Data migration
- Third-party integrations
- Reporting and dashboards
- Training and ongoing support

02

AI Business Automation

- AI assistants and chatbots
- Workflow and process automation
- Document and data processing
- AI-powered customer support
- System integrations
- Automated reporting and notifications
- Business-specific AI solutions

03

Custom Software Development

- Custom business applications
- ERP and CRM solutions
- Customer and employee portals
- Web applications and dashboards
- API development and integrations
- Internal management systems
- Maintenance and enhancement

Bring Your Business Operations Together.

Managing sales, finance, inventory, purchasing, and customer relationships across separate tools can make it difficult to see the full picture. Finovo Global helps businesses implement and customize Odoo ERP to bring relevant business processes into a connected environment.

THE BUSINESS VALUE

- Better visibility across operations
- Less duplicate data entry
- More consistent workflows
- Improved access to business information
- A platform that can expand with business needs

Final capabilities depend on the selected Odoo edition, modules, integrations, and implementation scope.

WHAT WE CAN DELIVER

01

Odoo Implementation

Configure selected Odoo applications around your agreed business requirements.

02

Module Configuration

Set up relevant modules for CRM, Sales, Accounting, Inventory, Purchase, HR, and other supported functions.

03

Customization

Adapt workflows, fields, forms, reports, and selected features to fit your processes.

04

Data Migration

Plan and support the transfer of agreed data from existing systems.

05

Integrations

Connect Odoo with selected third-party tools and business applications.

06

Training & Support

Help users understand the system and provide ongoing assistance under an agreed support plan.

07 · AI BUSINESS AUTOMATION

Let Your Team Focus on Work That Matters.

Not every task needs to be handled manually. From answering repetitive questions to moving information between systems, many business processes can be streamlined through carefully designed automation.

Finovo Global builds AI-powered tools and automated workflows that help businesses reduce repetitive work and improve how information moves across their operations.

THE BUSINESS VALUE

- Less repetitive administrative work
- Faster handling of routine requests
- More consistent process execution
- Better access to relevant information
- More time for customer service and decision-making

We don't add AI just because it's trending. We look for places where it can make a meaningful difference.

WHAT WE CAN BUILD

What We Can Build

01

AI Assistants & Chatbots

Answer common questions, retrieve approved information, and guide customers or employees through routine requests.

02

Workflow Automation

Automate agreed steps across enquiries, approvals, task assignments, notifications, and internal processes.

03

Document & Data Processing

Extract, classify, summarize, or organize information from supported documents and sources.

04

AI-Powered Customer Support

Help teams manage common enquiries and route more complex requests to the appropriate person.

05

Automated Reporting

Collect information from connected systems and prepare recurring summaries or reports.

06

Business System Integrations

Connect AI tools with selected CRM, ERP, email, and other business applications.

Software That Fits the Way You Work.

Off-the-shelf software may not cover every business requirement. When your processes need something more specific, custom software can provide a solution designed around your workflows.

Finovo Global develops tailored digital solutions to help businesses manage operations, serve customers, and connect their systems.

OUR DEVELOPMENT CAPABILITIES

- **Custom ERP Systems** — workflows, resources, operations and reporting
- **CRM Solutions** — leads, customers, sales activities and follow-ups
- **Business Web Applications** — for internal teams, customers or partners
- **Portals & Management Platforms** — customer, employee, vendor and role-based
- **Dashboards & Reporting Tools** — centralized views of business data
- **API Development & Integrations** — connect systems and move information

Our Development Focus

- Requirements-led planning
- User-friendly interfaces
- Appropriate security and access controls
- Scalable architecture based on project needs
- Testing and deployment
- Post-launch maintenance options

How We Work

Every engagement follows a process suited to its complexity and requirements.

FROM BUSINESS CHALLENGE
TO WORKING SOLUTION

01
Discover
We discuss your goals, existing systems, challenges, users, and priorities.

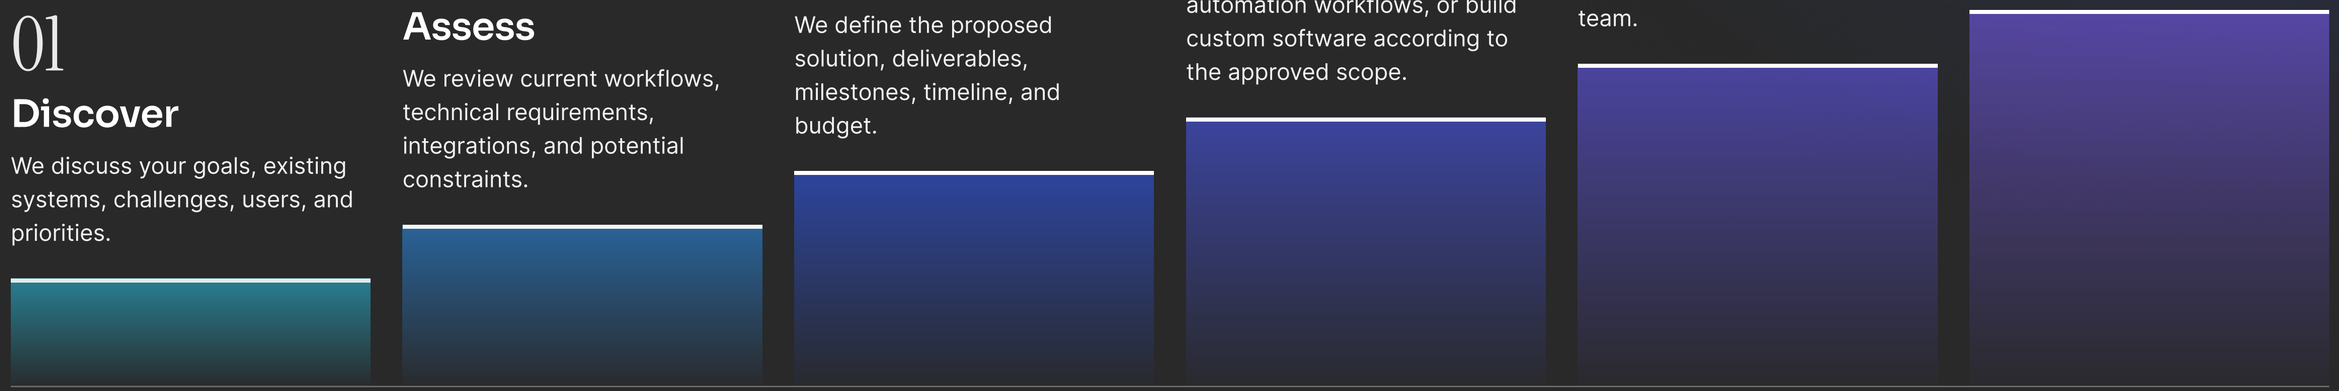

02
Assess
We review current workflows, technical requirements, integrations, and potential constraints.

03
Plan
We define the proposed solution, deliverables, milestones, timeline, and budget.

04
Build & Configure
We implement Odoo, develop automation workflows, or build custom software according to the approved scope.

05
Test & Validate
We test agreed functionality, resolve identified issues, and validate the solution with your team.

06
Deploy & Support
We assist with launch, knowledge transfer, and ongoing support as agreed.

Clarity.

Built With Clarity. Delivered With Purpose.

HOW WE DELIVER EVERY ENGAGEMENT

01

Clear Scope

We define what is included, what is excluded, and what success should look like.

02

Milestone-Based Delivery

Larger projects can be divided into manageable phases with agreed checkpoints.

03

Client Collaboration

Your team's feedback helps validate requirements and guide decisions throughout delivery.

04

Testing Before Launch

We validate the agreed functionality before deployment.

05

Knowledge Transfer

We provide appropriate documentation, walkthroughs, or training based on the engagement.

06

Continuous Improvement

We can support future enhancements as your business requirements change.

Security, Integration & Scalability

TECHNOLOGY YOU CAN BUILD ON

01	Access & Permissions	Role-based access and appropriate permissions, depending on the platform and scope.
02	Data Handling	Clear requirements for data migration, processing, storage, and access.
03	System Integration	Practical connections between relevant applications and existing workflows.
04	Testing & Reliability	Testing of agreed functionality and handling of identified issues before launch.
05	Scalability	Architecture and implementation choices aligned with expected usage and future growth.
06	Documentation & Support	Clear handover information and agreed support arrangements.

Specific security controls, hosting, compliance requirements, and service levels are defined for each project.

Our Approach Considers

Business technology must do more than work today. It should also be designed with future requirements in mind.

Industries We Serve

16
SECTORS

TECHNOLOGY FOR DIFFERENT BUSINESS NEEDS

We work with businesses across a range of industries, tailoring the solution to their workflows and operational requirements.

01 IT & Software
02 Professional Services
03 Finance & FinTech
04 Retail & E-commerce
05 Healthcare
06 Real Estate & Construction
07 Manufacturing
08 Logistics & Supply Chain
09 Wholesale & Distribution
10 Travel & Hospitality
11 Education & Training
12 Recruitment & HR
13 Automotive & Equipment
14 Trading & Import/Export
15 Startups & Growing Businesses
16 B2B & Enterprise Organizations

EXAMPLES OF BUSINESS CHALLENGES WE ADDRESS

- Disconnected departments and systems
- Repetitive customer enquiries
- Manual reporting and data entry
- Limited operational visibility
- Complex inventory or order processes
- Business workflows that require custom software

Industry-specific capabilities depend on project requirements, applicable regulations, and the selected technology.

Our Technology Packages

START WITH WHAT YOUR BUSINESS NEEDS.

Scoped engagement options across our three core services — each a starting point, adjusted to your systems, requirements, integrations, and business goals.

01

Odoo ERP Solutions

Essentials
For focused implementations

Growth
For multi-process implementations

Advanced
For more complex, integrated requirements

02

AI Business Automation

Starter
For one focused workflow

Growth
For multiple connected workflows

Scale
For broader, multi-system automation

03

Custom Software Development

MVP
For validating a core idea

Business
For a functional business application

Enterprise
For broader, more complex platforms

PRICING PRINCIPLE

We confirm the scope, timeline, dependencies, and final quote before work begins.

Odoo Implementation & Configuration

Three starting points for your Odoo journey.

IMPORTANT

These are indicative starting prices. Odoo subscriptions, third-party applications, hosting, extensive custom development, additional integrations, and taxes are excluded unless specifically included in the final quotation.

01

ESSENTIALS

Odoo Essentials

STARTING FROM

SAR 8,000 | USD 2,135

INCLUDES

- Initial requirements discussion
- Configuration of one agreed business process
- Setup of up to two agreed standard Odoo applications
- Basic user and access configuration
- Sample or agreed data import
- Basic testing
- One handover and training session

SUITABLE FOR

Businesses beginning their Odoo journey or addressing a focused operational requirement.

02

GROWTH

Odoo Growth

STARTING FROM

SAR 18,000 | USD 4,800

INCLUDES

- Process assessment and implementation plan
- Configuration of up to four agreed standard applications
- Standard workflow configuration
- Agreed data migration scope
- Basic reporting and dashboards
- One agreed standard integration, where technically supported
- User acceptance testing
- Team training and handover

SUITABLE FOR

Businesses connecting multiple operational processes.

03

ADVANCED

Odoo Advanced

STARTING FROM

SAR 35,000 | USD 9,335

INCLUDES

- Detailed requirements and process mapping
- Configuration of selected Odoo applications across agreed departments
- Defined customization allowance
- Agreed integration scope
- Data migration planning and execution
- Role and permission setup
- Testing and deployment assistance
- Training, documentation, and handover

SUITABLE FOR

Businesses requiring broader configuration and integration.

Automate Repetitive Work.

Improve how your business runs.

IMPORTANT

AI model usage, API consumption, third-party subscriptions, cloud infrastructure, and additional maintenance are charged separately unless included in the agreed scope. AI outputs require appropriate testing and oversight.

01

STARTER

AI Starter

STARTING FROM

SAR 5,000 | USD 1,335

For businesses looking to automate one clearly defined task.

INCLUDES

- Workflow discovery session
- One agreed automation workflow
- Basic AI or rule-based functionality, where suitable
- Connection to one supported system or data source
- Testing of agreed scenarios
- Basic documentation and handover

EXAMPLE

Automatically classify incoming enquiries and route them to the right team.

02

GROWTH

AI Growth

STARTING FROM

SAR 12,000 | USD 3,200

For businesses looking to improve several connected processes.

INCLUDES

- Workflow assessment
- Up to three agreed automation workflows
- AI assistant or chatbot for a defined use case, where suitable
- Integration with selected supported applications
- Notifications and task routing
- Testing and performance review
- Documentation and team walkthrough

EXAMPLE

Capture enquiries, organize lead information, assign follow-ups, and notify sales representatives.

03

SCALE

AI Scale

STARTING FROM

SAR 25,000 | USD 6,670

For businesses requiring broader automation across multiple systems.

INCLUDES

- Automation roadmap
- Multiple workflows defined in the project scope
- Integration with selected business systems
- AI-assisted information processing for agreed use cases
- Exception handling and human review steps
- Testing, deployment, and handover
- Initial post-launch support as specified in the quotation

EXAMPLE

Connect customer requests, internal task assignment, document processing, and management reporting.

From Your First MVP to a Complete Business Platform

IMPORTANT

Final pricing depends on functionality, number of user roles, design complexity, integrations, hosting, security requirements, and delivery timeline. Hosting, licenses, third-party services, and ongoing maintenance are excluded unless agreed.

01

MVP

MVP Development

STARTING FROM

SAR 15,000 | USD 4,000

For startups and businesses that need to validate a focused software idea.

INCLUDES

- Requirements and feature planning
- Basic user flow and interface design
- Development of an agreed core feature set
- Basic database and backend setup
- Testing of agreed functionality
- Deployment assistance
- Handover documentation

EXAMPLE

A simple customer portal, booking application, or internal tracking tool.

02

BUSINESS

Business Application

STARTING FROM

SAR 35,000 | USD 9,335

For businesses that need a more comprehensive operational application.

INCLUDES

- Requirements and solution planning
- UI/UX design for agreed screens
- Frontend and backend development
- User accounts and role-based access, where required
- Database design
- Selected API integrations
- Testing and deployment
- Documentation and handover

EXAMPLE

A custom CRM, service management platform, or business operations dashboard.

03

ENTERPRISE

Enterprise Platform

STARTING FROM

SAR 75,000 | USD 20,000

For organizations requiring a broader, more complex software solution.

INCLUDES

- Discovery and technical planning
- Defined multi-module application scope
- Custom interface and backend development
- Agreed system integrations
- Permissions and access-control implementation
- Testing and deployment planning
- Technical documentation
- Handover and agreed launch support

EXAMPLE

A multi-department management system or a platform connecting customers, employees, and business partners.

01 **System Integration**

Connect existing business tools and applications.

02 **Data Migration & Cleanup**

Plan the transfer and organization of data between systems.

03 **Business Process Consulting**

Identify opportunities to simplify workflows before implementing technology.

04 **Dashboards & Reporting**

Create clearer views of relevant operational information.

05 **Application Maintenance**

Provide agreed bug fixes, updates, and technical assistance.

06 **Cloud & Deployment Support**

Assist with deployment and hosting configuration where included in scope.

07 **Technical Documentation & Training**

Help your team understand and manage the delivered solution.

08 **Legacy System Modernization**

Assess and improve existing applications or replace selected outdated processes.

12 · ADDITIONAL SERVICES

Support Beyond the Initial Implementation

In addition to our three core service areas, we can scope related services based on your business requirements.

OUR CORE SERVICE AREAS

ODOO ERP | AI AUTOMATION | CUSTOM SOFTWARE

Additional services are quoted according to the scope, technical requirements, and resources needed.

PROJECT TERMS & ENGAGEMENT

Clear Expectations. Better Collaboration.

To ensure every engagement starts with a shared understanding, we agree on the following before work begins.

Scope & Deliverables

The proposal defines the agreed features, services, deliverables, and exclusions.

Timeline & Milestones

Delivery dates depend on project complexity, client feedback, approvals, and third-party dependencies.

Payment Terms

Payment schedules and milestones are confirmed in the final quotation or service agreement.

Client Responsibilities

Clients provide timely access, relevant information, approvals, and any required third-party accounts.

Licenses & Third-Party Costs

Software subscriptions, hosting, AI usage, APIs, and other external fees are excluded unless stated otherwise.

Changes & Additional Work

Requests beyond the approved scope may require a revised timeline and additional fees.

Support & Maintenance

Post-launch support, response times, and service levels are defined separately in the agreement.

Pricing & Taxes

All package prices are indicative starting prices. Applicable taxes and final payment currency are confirmed in the commercial proposal.

LET'S BUILD WHAT'S NEXT

Ready to Make Your *Business Work Smarter?*

FINANCE FOR WHAT'S NEXT. TECHNOLOGY FOR WHAT'S POSSIBLE.

Whether you want to connect your operations with Odoo, automate repetitive work using AI, or develop software built around your business, Finovo Global can help you explore the right approach. Let's discuss your challenges, identify opportunities, and define the next steps.
